

What is astrology ?

Astrology is concerned with mathematics, motion, matter etc. Astrology is like determining personality traits and generally predictions concerning a person's life experience. Generally calling astrology a science in the presence of someone who actually practices science (like the skeptic who became a client of mine, who is the physicist by professional) is a great way to alienate him or her.

Our Vision

Nowadays people expect astrologers are magicians, they just you can see and start narrating about your past, present and future

Astrology has been a blessing in disguise for those who have always been worried about their future. It has not only given the advantages of seeking the future but also the solutions which will help you the native to solve any problems faced by them in any case of an unexpected incident. Ideally, it has not only helped individuals to overcome financial problems but also provided the best growth

astrological remedies in every aspect of work including business, profession and career. Kundali milan is the technique to check compatibility between bride and the groom. Kundli matching is called some culture based on milan professionals of Astrology. When you decide to marry someone but don't take decisions easily, first you have to match your kundli after you can marry each other.

About Me

I am a professional astrologer myself and I have been practicing astrology for the last 17 years. And I have been able to convince a couple of skeptics of the validity of astrology.
